2D Nano Mat - 2021

International Conference on Recent Trends in 2D Nanomaterials: Synthesis, Properties and Applications: A Virtual Event

Date: February 24-26, 2021

OBJECTIVES OF THE CONFERENCE

The conference is focused on the theme Recent Trends in “2D Nano Materials: Synthesis, Properties and Applications” (2D Nano Mat 2021) which eventually aims to bring together scientists, technologists and researchers across the globe to exchange their views and ideas for possible scientific collaborations in the subject of interest. 2D Nano Mat 2021 as a special theme deals with the applications of various 2D Nanomaterials synthesis techniques and applications in the field of science and technology. The subject area includes frontiers in physics and chemistry of 2D materials and their applications in technologies which have societal perspective. The conference will cover experimental and theoretical aspects of subject matter. Specifically, studies of novel, advanced 2D materials along with mechanisms involved will be highlighted together with the applications of these materials in the domain of Surface Protection and Modification, Batteries, Solar cells, Photodetectors, Supercapacitors, Sensors, Actuators, Photoelectrochemical cells, Nanoelectronics devices and Biotechnology.
